

Concrete Attachment

- ✓ Creates a watertight seal between concrete and liner.
- ✓ Attaches liner to new or existing concrete structures.
- ✓ Proven method of mechanical attachment of liners.

Attachment Methods:

- Stainless Steel Fixing.
- HDPE Polylock Insert.

AEL supply and install recognised methods for attaching liners to concrete structures.

A combination of Stainless Steel bar, stainless steel bolts and rubber gaskets are generally used for attaching to existing concrete.

Polylock inserts are fabricated and installed into new concrete structures and penetrations.

Concrete Attachment
